## Software Engineering and Lighting Controls for Safe, Smart Buildings

# Why Choose Encelium?

- We design and deliver software solutions that improve public safety, assist individuals with disabilities, ensure secure infrastructure and produce significant energy savings to create smart buildings.
- We eliminate wasted energy, putting money back in your budget.
- Our systems pay for themselves.
- We are the proven technology leader in health/safety/fire solutions that fulfill requirements of the Americans with Disabilities Act.

# Encelium Disability Compliance

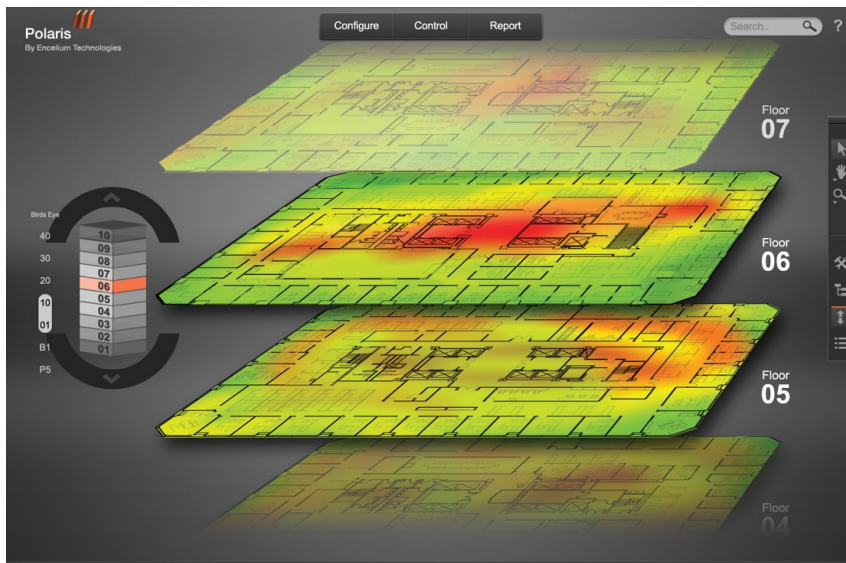

Encelium products meet all ADA requirements and regulations.

Our green software solutions make it easy for government agencies to meet disabilities issues while improving employee performance and increasing energy efficiency in the workplace.

- Section 508 compliant
- Computer/Electronic Accommodations Program (CAP) compliant
- FCC Deaf-Blind Program compliant
- FCC 9-1-1 Next Generation compliant
- FCC National Broad Plan compliant
- Twenty-First Century Accessibility Act 2010 compliant

# Serious Energy Savings

Federal agencies can save up to 75 percent in office-building energy consumption with Encelium products integrated into existing lighting systems, while enhancing public safety and satisfying ADA requirements. Our energy management and software systems deliver the shortest possible payback from energy savings while improving lighting quality and personal lighting comfort.

# Encelium = Efficiency

Our software  
engineering  
systems deliver all  
the tools needed  
for Executive Order  
Compliance

Imagine a solution that delivers unprecedented monitoring and control of your building for greater energy efficiency, public safety and security. It's here. Today.

Encelium creates an improved ROI equation, while helping agencies meet all federal ADA mandates. Do it all with our systems.

# Emergency Preparedness

Encelium software and lighting control systems help federal agencies effectively address the needs of all personnel, including those with disabilities.

Our systems are custom designed to meet the unique needs of your facilities as well as all requirements for emergency preparedness.

# Seamless Project Implementation

At Encelium, our commitment to excellence extends beyond software engineering and lighting installations.

To ensure a smooth project that satisfies all constituencies, we work with:

- Emergency Management Organizations and Groups
- National Fire and Rescue Organizations [NFPA, IAFC, IAFF, etc]
- Federal regulatory agencies [OSHA and GSA]
- Employee Labor/Union Organizations

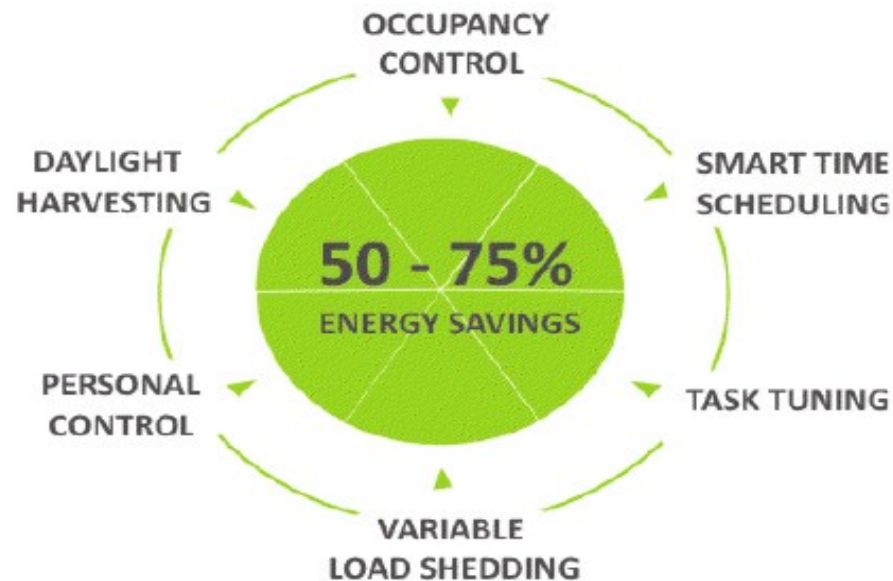

# With Encelium, You're Always in Control

LIGHTING CONTROLS FOR THE SMART BUILDING

## ENERGY MANAGEMENT STRATEGIES DEPLOYED

# Never Waste a Watt of Energy

Encelium software solutions eliminate wasted energy while promoting a green workplace that's safe, secure and saves money in your budget.

- Addressable fixture level dimming and switching controls coupled with easy to use software respond to the ever-changing characteristics of a building. The result? You achieve the right amount of light when and where required – right on your PC – eliminating wasted energy.
- Occupants have control of their own work environment, facility managers can control every facet of their lighting systems and energy managers control lighting as part of a facility-wide strategy to maximize savings.
- Comply with Building Codes and Energy Efficiency Standards. Our solutions facilitate compliance with Title 24, ASHRAE 90.1, EPCACT and various utility rebate programs.

# Connect Everything Today (and Tomorrow)

Deploy Encelium solutions to defy the constraints of time and technology.

With our forward-thinking software applications, you'll be able to seamlessly connect applications, devices and infrastructure to improve the performance of your team and help the people you serve – now and in the future.

# Encelium Helps You Meet Budget Mandates

The Office of Management and Budget in August issued Memorandum M-11-30, requiring all federal departments and agencies "to set outcome-focused priorities, identify the most cost-effective practices and programs, and speed their adoption." Let us show you how we can improve your facilities.

The General Accounting Office in a June 1 report to Congress urged all federal agencies to identify "opportunities to reduce potential duplication in government programs, ***save tax dollars, and enhance revenue.***"

# Encelium: Intelligent Systems That Save

Federal mandates are never easy to meet, but need not be impossible. At Encelium, our software engineers are ready to transform your facilities into greener, more efficient smart buildings that enhance public safety, meet ADA requirements, save federal dollars and improve lives. Let's get started.
